Clariant International Ltd
Rothausstrasse 61
4132 Muttenz
Switzerland

Facts & Figures

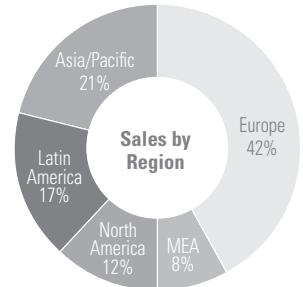

SALES BY BUSINESS UNIT¹

¹Excluding Süd-Chemie businesses

²Performance Chemicals includes the BUs Additives, D&I, Emulsions and Paper Specialties

REGIONAL MARKETS¹

Sales refer to 2010 figures.
Total: CHF 7120 mn

Clariant – exactly your chemistry

We are a world leader in the field of specialty chemicals. Our products enhance every aspect of modern life by providing color and a vast array of functional effects. Our outstanding application know-how, world-class research and manufacturing capabilities make us a preferred partner, wherever our customers are.

Headquartered in Muttenz near Basel, Switzerland, Clariant is represented by more than 100 Group companies and employing more than 16,000 people globally. Clariant Group has twelve Business Units: Additives; Catalysis & Energy, Detergents & Intermediates, Emulsions, Functional Materials, Industrial & Consumer Specialties, Leather Services, Masterbatches, Oil & Mining Services, Paper Specialties, Pigments and Textile Chemicals.

KEY FACTS

Sales -

Annual sales of CHF 7.1 billion in 2010

Global structure -

- Headquartered in Muttenz near Basel, Switzerland
- More than 100 group companies

Employees -

- Approximately 16,000 employees
- 86 nationalities represented

Management -

Chairman: Jürg Witmer
CEO: Hariolf Kottmann

Business Units defined

Additives

Our Additives create value by improving efficiency, safety, protection, durability and appearance of products such as plastics, coatings and printing inks.

Catalysis & Energy

Catalysis & Energy is a highly innovative provider of catalysts for the chemical, fuel, and automotive industries and produces materials for electric vehicles and energy storage systems.

Detergents & Intermediates

Our Detergents & Intermediates business is a leading supplier of key raw materials for laundry detergents and cleaning products.

Emulsions

From paints, adhesives and construction to the textile, leather and paper industries, our Emulsions can be found in a wide range of applications.

Functional Materials

Based on our bentonite products we offer environmentally compatible solutions in order to improve products and processes in various industries including the consumer goods, packaging and foundry industries, as well as water treatment.

Industrial & Consumer Specialties

The innovative products of our Industrial & Consumer Specialties business are used in skin and hair care, household goods, to protect seeds or de-ice airplanes.

Leather Services

We are a leading provider of chemicals, technical services and solutions over the entire value chain of leather production.

Masterbatches

Local focus, global standards – our Masterbatches business is a global leader in color, additive concentrates and innovative performance solutions for plastics.

Oil & Mining Services

Solving local challenges with global capabilities and a deep reservoir of resources.

Paper Specialties

Our products improve the optical and functional properties of all kinds of paper and board via tailored solutions.

Pigments

Based on extensive experience and expertise in color, our Pigments business helps to color the world.

Textile Chemicals

From fiber to finish, Clariant's chemical technology plays a key role throughout the entire textile supply chain.

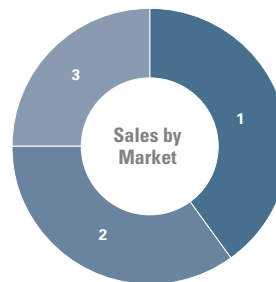

Clariant Additives is a leading provider of flame retardants, waxes and polymer additives that enhance and protect. We serve customers across a wide range of applications and sectors, including electronics, construction and automotive.

Decades of experience, with support through our global technical centers, make many of our products the industry standard in technical performance and quality.

Our leading technologies contribute to sustainable development; supporting more environmentally compatible protection and taking our customers a step closer towards more efficient processing.

KEY MARKETS

- 1 Waxes** - plastics, coatings, inks, polish, technical textiles, adhesives, powder metal, road construction
- 2 Flame retardants** - intumescent coatings, electronics and electrical appliance, automotive and transportation, military
- 3 Polymer additives** - antioxidants, antistatic agents

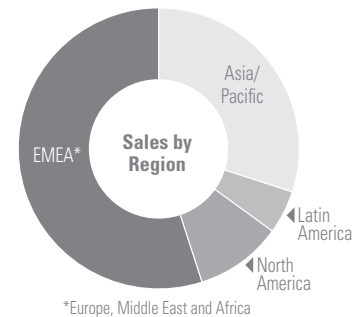

KEY PRODUCTS

Waxes including Licocene®, Licowax® and Ceridust®

Flame retardants including Exolit®

Polymer additives such as Hostavin®, Hostanox®, Hostatstat® and Nylostab®

REGIONAL MARKETS

ADDITIVES

Our Additives create value by improving efficiency, safety, protection, durability and appearance of products such as plastics, coatings and printing inks.

For further information on Additives visit
www.additives.clariant.com

CATALYSIS & ENERGY

Clariant Catalysis & Energy is a highly innovative provider of catalysts for the chemical, fuel, and automotive industries and produces materials for electric vehicles and energy storage systems.

Our catalysts contribute significantly to value creation in our customers' operations, ensuring that finite raw materials and energy are used efficiently in the production of industrial chemicals, plastics, and fuels.

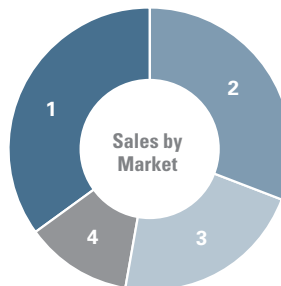

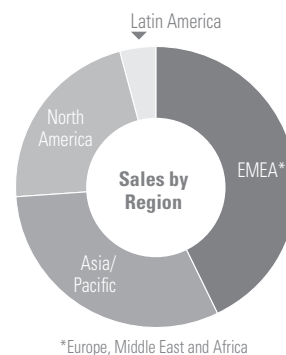

Our products enable the use of alternative raw materials – such as natural gas, coal and biomass – as chemical and energy feedstocks, and are used to treat emissions from industrial processes to limit their impact on the environment.

Our high performance cathode battery material and catalysts for fuel cell applications set the benchmark for their applications and are increasingly important to our society and global markets.

KEY MARKETS

- 1 Chemicals manufacturing**
- catalysts for production of commodity and speciality chemicals
- 2 Petrochemicals and Plastics** - production of petrochemical intermediates and polymers
- 3 Refinery operations** - catalysts to make clean fuels and for hydrogen generation
- 4 Environmental, automotive and energy industry** - catalysts for off-gas treatment and products for power systems

REGIONAL MARKETS

For further information on Catalysis & Energy visit
www.catalysis-energy.clariant.com
www.sud-chemie.com

DETERGENTS & INTERMEDIATES

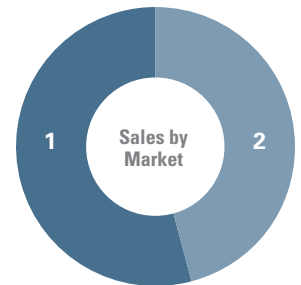

Our Detergents & Intermediates business is a leading supplier of key raw materials for laundry detergents and cleaning products.

We work in close co-operation with multinational consumer brands through to specialized producers of laundry and cleaning products, to research, develop and supply solutions for optimum wash performance and cost-efficiency – and lower impact on the environment.

In addition, we are a major supplier of chemical intermediates, especially for the manufacture of agrochemicals and pharmaceuticals. Clariant is a global leader for the production of glyoxal and glyoxylic acid and their derivatives, with over 40 years of experience of these complex molecules.

KEY MARKETS

- 1 Household & cleaning**
- includes cleaning agents, stain removers, laundry detergents, dishwasher detergents, liquid all-purpose cleaners, liquid metal/ceramic cleaners, sanitary cleaners
- 2 Agrochemicals, pharmaceuticals & other special applications**
- includes ingredients for fungicides, herbicides, medicines, fragrances, flavors, dyestuffs

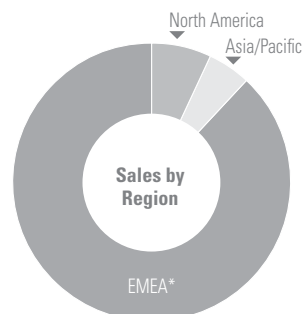

KEY PRODUCTS

Detergents TAED, SKS®6, Soil Release Polymer and Paraffin Sulphonate

Intermediates Glyoxal, Glyoxylic Acid, Oxalic Acid, Building Blocks

REGIONAL MARKETS

*Europe, Middle East and Africa

For further information on Detergents & Intermediates visit
www.detergents-intermediates.clariant.com

EMULSIONS

From paints, adhesives and construction to the textile, leather and paper industries, our Emulsions can be found in a wide range of applications.

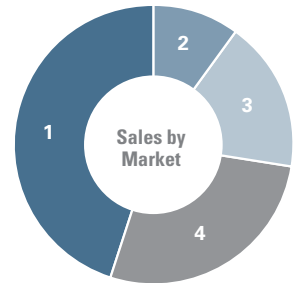

With a global network of 14 production sites located exclusively in emerging markets, our Emulsions business is a major supplier of solutions in water-based emulsions/polymer dispersions.

More than 90 years of technical application experience makes us a trusted partner. We help customers to enhance their brand, reduce costs, improve efficiency and capture new markets.

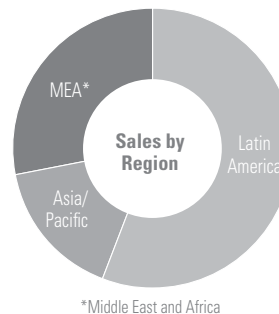

Being water-based, our products are particularly suitable for the manufacture of products with less impact on the environment, avoiding the use of solvents.

KEY MARKETS

- 1** **Paints** - decorative interior and exterior, primers, varnishes, anti-corrosion and industrial applications
- 2** **Constructions** - concrete applications, roofing, tiling, sealants and primers
- 3** **Adhesives** - wood, paper, lamination, packaging and Pressure Sensitive Adhesives (PSA)
- 4** **Textiles, leather and paper** - for a wide range of functional effects and coatings

REGIONAL MARKETS

KEY PRODUCTS

Mowilith® used in paints, adhesives and construction

Mowilith® for our ready-to-use adhesive lines

Appretan® and **Printofix®** binder used in textiles

Melio® used in leather

Cartaseal®, Cartacoat® and **Cartacol®** for paper

Major monomer systems include: Polyvinylacetate (PVA), Vinylacrylate (VAC), Vinyl Ester of Versatic Acid Copolymers and Terpolymers, Acrylates, Styrene-Acrylates

For further information on Emulsions visit www.emulsions.clariant.com

We are leading provider of specialty products and solutions to enhance products and processes.

In the adsorbents area, for example, our bleaching earths for the purification of vegetable oils are the world leader in a worldwide growing market.

With our water treatment and water management solutions, we are a niche supplier in attractive markets in both developed and emerging economies.

Our performance packaging line provides functional protective packaging solutions for pharmaceuticals and high-grade desiccants for logistics and consumer products.

KEY MARKETS

- 1 Consumer industry** - various products and applications including bleaching earths for processing and purification of vegetable oils, detergent additives, and animal feed additives
- 2 Foundry and construction industry** - Bentonite-based additives for stabilizing moulding sands for iron castings and bentonite-based additives for supporting fluids in civil engineering works like special foundations, tunneling, pipe jacking and drilling
- 3 Plastic additives** - Hydrotalcites - (eco-friendly lead-free PVC stabilizers and acid scavenger for poly-olefins)
- 4 Water treatment** - products and solutions to process waste water for the oil, beverage and mining industries as well as for communal waste water treatment and drinking water processing
- 5 Performance packaging** - protective packaging solutions for pharmaceutical and diagnostic products; desiccant systems for protection of high-value goods consumer goods and equipment during global transportation and storage

KEY PRODUCTS

- Various bleaching earths and bentonite products
- Hydrotalcite
- Tubes, stoppers, packets desiccant bags, humidity indicator cards etc.
- Water treatment chemicals and equipment

FUNCTIONAL MATERIALS

Based on our bentonite products we offer environmentally compatible solutions in order to improve products and processes in various industries including the consumer goods, packaging and foundry industries, as well as water treatment.

For further information on Functional Materials visit
www.functionalmaterials.clariant.com
www.sud-chemie.com

We combine high quality products with formulation expertise to deliver solutions with compelling cost/performance ratios and environmental benefits to customers.

Our core competencies include being a partner of choice in industrial lubrication, construction and paints & coatings, and helping customers to gain a competitive edge in the laundry and cleaning segments.

We have a strong focus on ecologically sustainable solutions. These range from skin care formulations based on raw materials from renewable resources to aviation de-icing recycling systems.

KEY MARKETS

- 1 Paints, coatings & construction** - additives for concrete & mortar, dispersing agents, defoamers, biocides, and emulsifiers for emulsion polymerization
- 2 Personal care** - ingredients for skin & hair care cosmetics, wet wipes and pharmaceutical applications
- 3 Industrial & home care** - ingredients for household and industrial cleaning solutions
- 4 Industrial lubricants** - ingredients for hydraulic, metal working and other performance fluids
- 5 Engineering & aviation** - including aircraft and runway de-icers, special solvents, and fluids for heat transfer, gas scrubbing and automotive
- 6 Crop protection** - formulations for fungicides, herbicides and seed treatments

KEY PRODUCTS

Aristoflex® Rheology modifiers that simplify the manufacture of attractive Personal Care products

Genamin® Ingredients for hair care formulations for excellent conditioning and brilliant shine

Hostacerin® Emulsifiers for all skin care formulations

Emulsogen® and **Genapol®** High-quality emulsifiers for formulations in consumer care and industrial applications

Synergen® Efficient adjuvants for crop protection formulations

REGIONAL MARKETS

*Europe, Middle East and Africa

INDUSTRIAL & CONSUMER SPECIALTIES

The innovative products of our Industrial & Consumer Specialties business are used in skin and hair care, household goods, to protect seeds or de-ice airplanes.

For further information on Industrial & Consumer Specialties visit www.ics.clariant.com

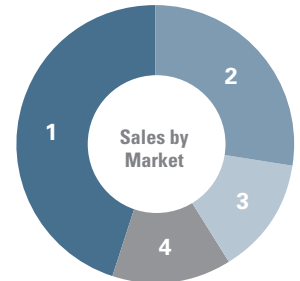

From beamhouse to finishing, we provide high-quality leather processing chemicals and services with less impact on the environment, and a world-class knowledge of leather upgrading and chrome-free tanning solutions.

Our customers in the shoe, automotive, furniture and garment segments benefit from customized technical solutions, and our expertise in areas such as performance leathers and more environmentally-compatible solutions.

We help our customers to achieve consistently brilliant colors and natural tones, combined with performance every time.

KEY MARKETS

- 1 Shoes & accessories** - including handbags, belts etc.
- 2 Automotive** - leather seating and associated uses
- 3 Furniture** - sofas, chairs and other furnishings
- 4 Garment & fur** - coats, leatherware, fur

KEY PRODUCTS

Granofin® Sustainable tanning solutions

Tergotan® New generation of retan and soft polymers for a supple, natural and relaxed leather

Melioderm® To cover all dyeing needs

Melio® Aquabase Value-adding masking of leather defects

Aqualen® High performance, low VOC, NMP-free topcoats

LEATHER SERVICES

We are a leading provider of chemicals, technical services and solutions over the entire value chain of leather production.

A worldwide presence and local support make Masterbatches a preferred supplier for thermoplastic processors, brand owners, and fiber manufacturers globally.

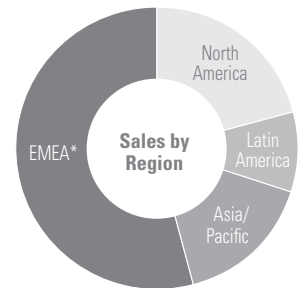

Our customers span a broad range of markets, including packaging, consumer goods, medical, textile and automotive. With our leading technology enhancing plastic everywhere – from medical devices to drinks bottles made from recycled materials and innovative car components.

Our dedicated network of ColorWorks™ design centers help customers increase their speed to market and differentiate brands.

KEY MARKETS

- 1 Packaging** - includes home & personal care, food & drink and industrial
- 2 Consumer goods** - includes appliances, electrical, sports, toys and construction
- 3 Medical** - includes devices and pharmaceutical packaging
- 4 Textiles** - includes carpets, non-woven, sports apparel
- 5 Automotive** - includes interior and exterior parts, engine components

REGIONAL MARKETS

*Europe, Middle East and Africa

KEY PRODUCTS

Remafin® Masterbatches, liquids and specialty compounds for olefins

Renol® Masterbatches, liquids and specialty compounds for non-olefins

Cesa® Standard and specialty additive masterbatches

Hydrocerol® Chemical foaming agents

Mevopur® Dedicated masterbatches and compounds for the medical and pharmaceutical sector

Enigma® Special effects

Omnicolor® Multipurpose masterbatches

MASTERBATCHES

Local focus, global standards – our Masterbatches business is a global leader in color, additive concentrates and innovative performance solutions for plastics.

For further information on Masterbatches visit www.clariant.masterbatches.com

In today's oil and mining industries, providing the right chemicals is simply not enough. Customers demand the best chemical technologies available, as well as services that are second-to-none. Likewise, local infrastructure and manufacturing with global support is now a key requirement.

Our growing network of service and research centers within all major oil, refinery and mining markets, has access to resources on a scale unsurpassed in these industries.

This allows us to deliver innovation and enhanced value through improved supply chain, cost reduction and the ability to custom design both operational and technological solutions. All with the highest regard for health, safety and the environment; whether deepwater, refinery or at the mine site.

By dividing our business into three segments - Clariant Oil Services, Clariant Refinery Services and Clariant Mining Solutions – we ensure that our industry leading experts can focus on delivering maximum value for the specialist needs of each area.

KEY MARKETS

- 1 **Production chemicals and services** - well services additives, production optimization technologies and services, pipeline chemicals and services and water management solutions
- 2 **Refinery additives** - fuel additives, process chemicals and terminal treatment additives
- 3 **Mining chemicals and solutions** - mineral processing, flotation, dust control, explosive emulsifiers and fertilizer additives

OIL & MINING SERVICES

Solving local challenges with global capabilities and a deep reservoir of resources.

For further information on Oil & Mining Services visit www.oil.clariant.com or www.mining.clariant.com

Clariant aims to provide first class knowledge and expertise in the management of whiteness, coloration, special coatings and strength for all kinds of paper, offering the most cost effective product choices and solutions to its customers.

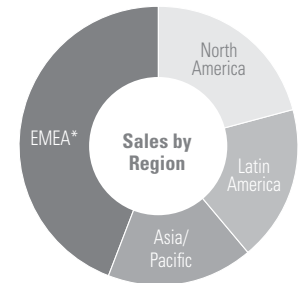

Our innovative technologies deliver leading edge, environmentally friendly and sustainable solutions for the papermakers around the world.

Our key markets are printing & writing copy papers, coated paper and board, recycled papers, newsprint, packaging and specialized applications.

KEY MARKETS

- 1 Printing & writing** - photocopied paper, writing paper, magazines, newsprint
- 2 Tissue & toweling** - toilet paper, nappies, napkins, tissues, hand towels
- 3 Packaging & board** - cardboard, cartons, food packaging
- 4 Specialties/non-wovens** - including medical masks and gowns, air filters

REGIONAL MARKETS

*Europe, Middle East and Africa

KEY PRODUCTS

Cartasol® M Best performance dyes for packaging

Flexonyl® Pigment preparations especially designed for paper applications

Leucophor® Optical brightening agents for innovative whiteness solutions

Cartaspers® PSM Keeping paper machines cleaner, faster, for longer

Cartabond® Crosslinkers for improved offset printing and converting

Cartafix® A broad range of dye fixation solutions

PAPER SPECIALTIES

Our products improve the optical and functional properties of all kinds of paper and board via tailored solutions.

For further information on Paper Specialties visit www.paper.clariant.com

Clariant helps customers get the best from color.

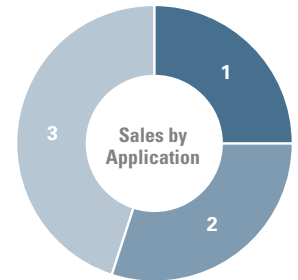

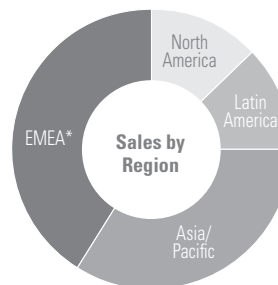

We are a leading global provider of organic pigments, pigment preparations and dyes used in coatings, paints, printing, plastics and other specialty applications.

Our pigments make a difference to a whole host of products that touch everyday life. Automotive and home decoration paints, household detergents, packaging labels, colorants used in ink jet and laser printers.

All with a firm focus on the challenges and efficiency requirements of these varied sectors.

KEY MARKETS

- 1 Printing** - traditional & non-impact printing and electronic displays
- 2 Plastics and special applications** - all plastic applicators including films, fibers and special applications, including detergent coloration, cosmetics and aluminum finishing
- 3 Coatings** - automotive, industrial, decorative and architectural paints and coatings

**REGIONAL MARKETS**

*Europe, Middle East and Africa

KEY PRODUCTS

Pigments Hostaperm®, Novoperm®, Hansa®, PV Fast®, Graphtol®

Pigment preparations Colanyl®, Hostatint®, Hostajet®, Permajet®, Hostaprint®, Hostasin®

Dyes Duasyn®, Savinyl®

Other products Easily dispersible pigments from the Hostaperm® and Novoperm® ranges

PIGMENTS

Based on extensive experience and expertise in color, our Pigments business helps to color the world.

For further information on Pigments visit www.pigments.clariant.com

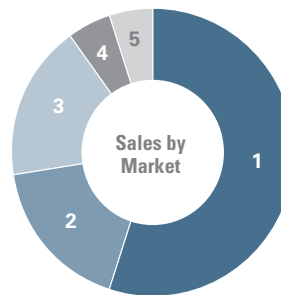

As a leading producer of dyes and chemicals for the textile industry, brands and mills in apparel & fashion, automotive & home textiles, and technical textiles, turn to us to meet their sector's constantly changing specifications.

Our color trends analysis and color matching technology, combined with processing efficiency, help our customers to get their products to market faster.

While nanotech effects, environmentally friendlier solutions, and unique concepts add to their ability to stay one step ahead of the competition.

KEY MARKETS

- 1 Apparel** - includes clothing of all types and fashions
- 2 Home textiles** - such as towels, drapes, linens and furniture fabrics
- 3 Technical textiles** - for applications including medical, construction, sports, and industrial
- 4 Carpet** - includes indoor and outdoor floor coverings
- 5 Mobiltech** - stands for fabrics in hard-wearing transport applications - planes, buses and trains

KEY PRODUCTS

Advanced Denim The innovative and sustainable solution for the denim market

Drimaren® Reactive Dyes for Cellulosic colorations

Foron® Disperse dyes for highest wash and lightfastness requirements

NanoSphere®¹ and **coldblack®²** Innovative Finishes for Functional Effects

Nuva® N The next generation of soil & stain release

Nylosan® Acid Dyes for Polyamide Coloration

¹ NanoSphere® is a registered trademark of Schoeller Technologies AG, Switzerland (patent protected technology).

² coldblack® is a registered trademark of Schoeller Technologies AG, Switzerland (patent pending).

REGIONAL MARKETS

*Europe, Middle East and Africa

TEXTILE CHEMICALS

From fiber to finish, Clariant's chemical technology plays a key role throughout the entire textile supply chain.
